

Stakeholder Engagement Breakfast Meeting

30th August

2018

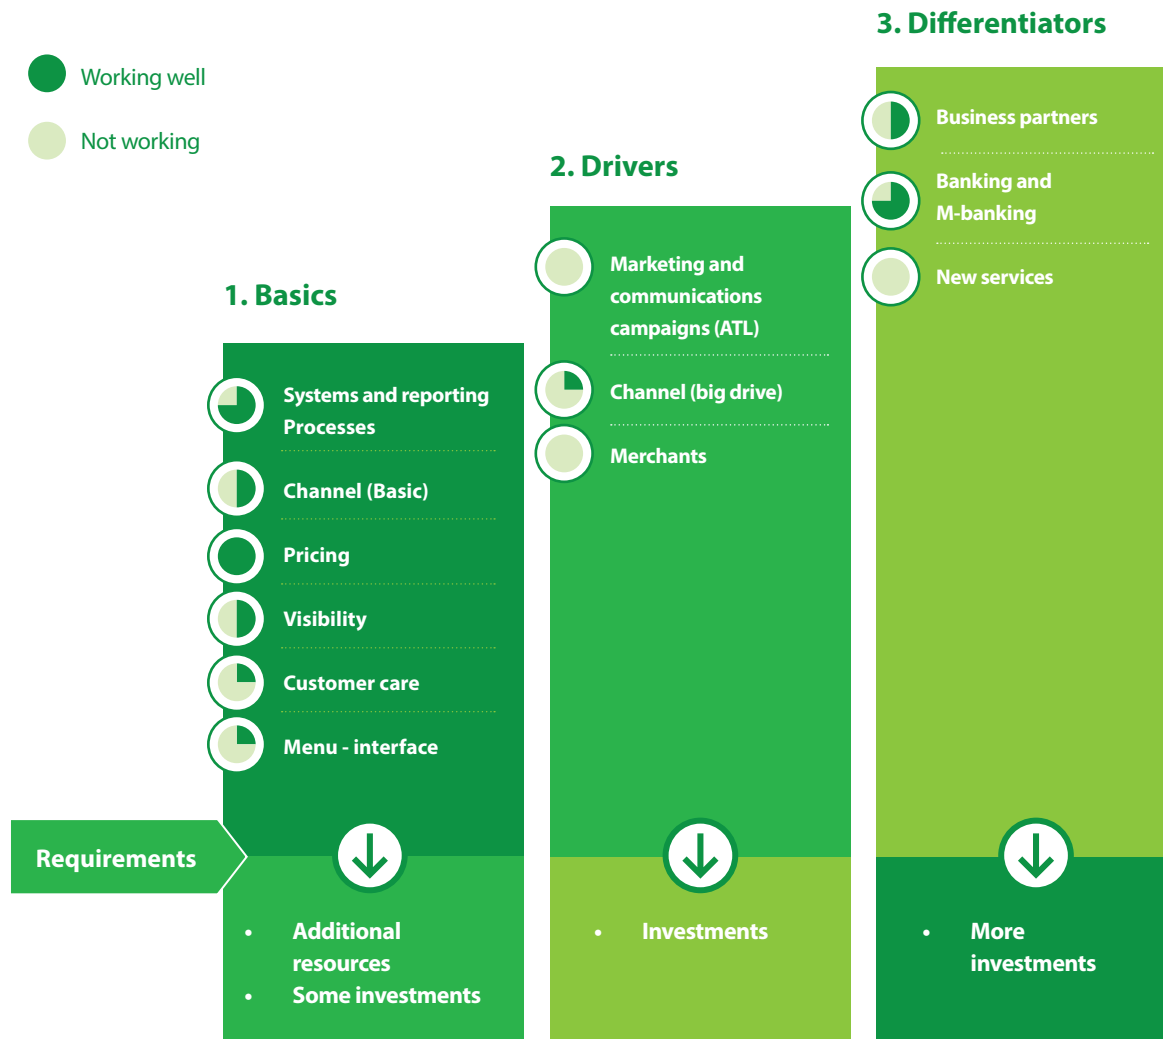

The bottom Line

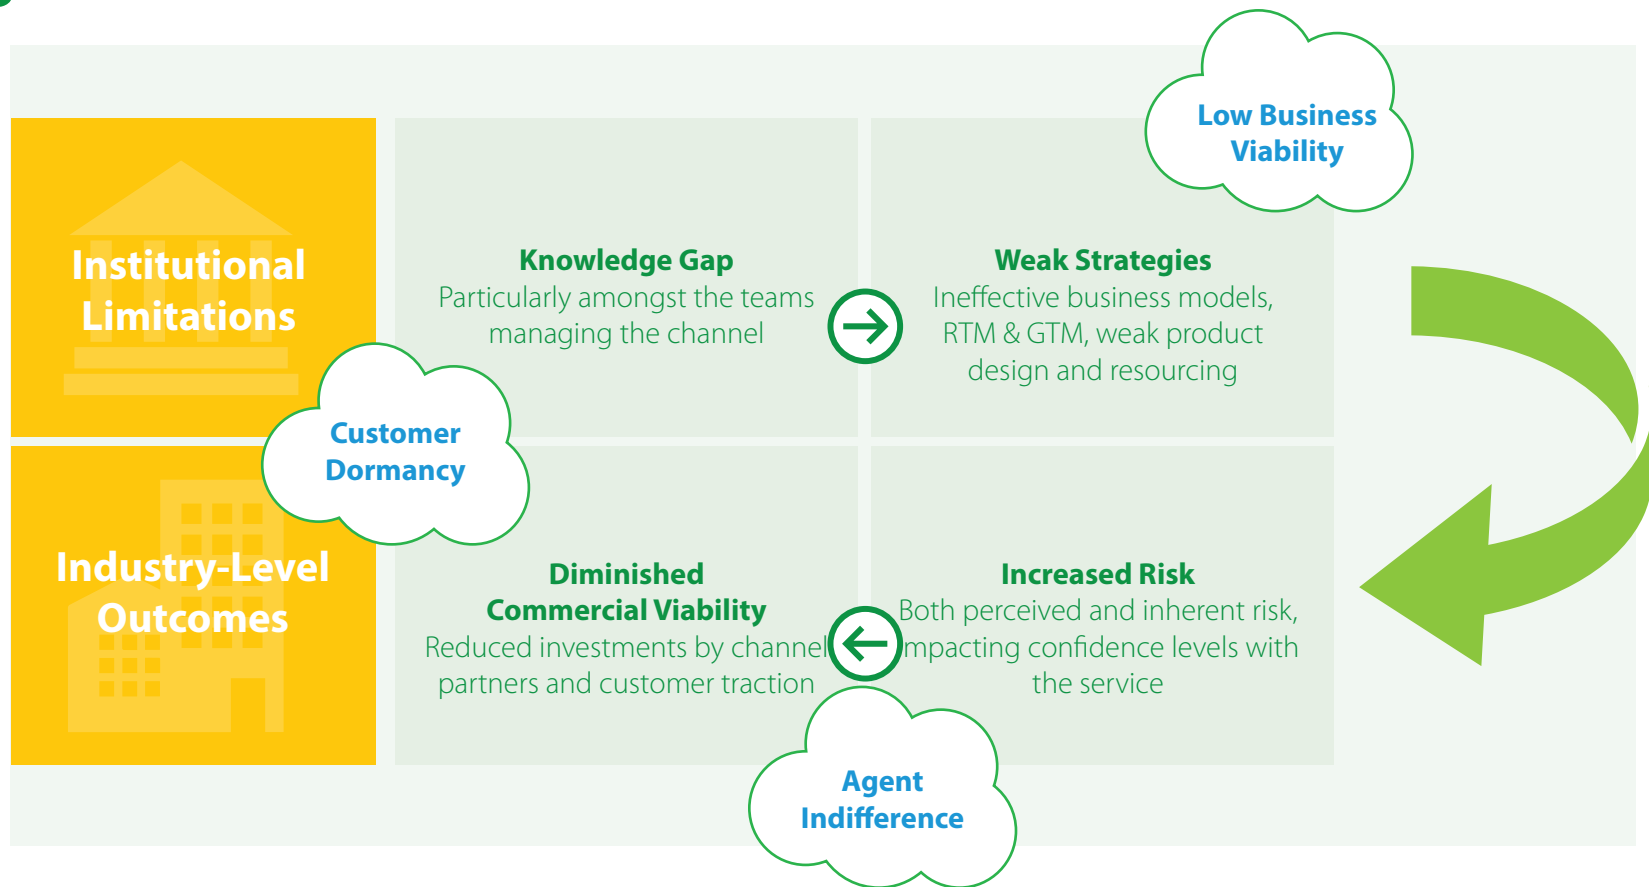

Agency Banking service roll-out is facing a set of bottlenecks across the Rwanda market which need to be addressed for it to be able to build its financial inclusion differentiators

Agency Banking in Rwanda: Current Analysis

- Working well
- Not working

Why Shared Agency Banking Services?

The bottom Line

Micro-Level institutional limitations and challenges in appreciating the dynamics of agency banking have an aggregate impact on the industry, leading to reduced traction and viability for the channel.

Facts & Figures

\$1.5M

The cost of Setting
Up Agency Banking

\$1.2M

Amount of Cash
AFR is investing the
Project

\$250K

Amount of money
required to set up a
Bank Branch

Service Providers to
Pilot SABS

SABS Project Approach and Expected Outcomes

Closing the Knowledge Gaps

Strategic-level training for mid to senior level managers for all channel partners

Operational-level training for all mid-level managers and their implementing staff

Risk Containment

Review and implement **new RTM strategy and SOPs** to increase agent network monitoring and support

Sustained BTL, ATL & TTL **marketing communication** campaigns focused on consumer protection and product knowledge

Standardise **product delivery**

Strengthening Strategic Operations

Conduct strategic assessments at organisational level

Evaluate and remodel the business model at both institutional and industry level

Motivate for strategic partnerships at industry level to increase co-opetition levels

Building Commercial Viability

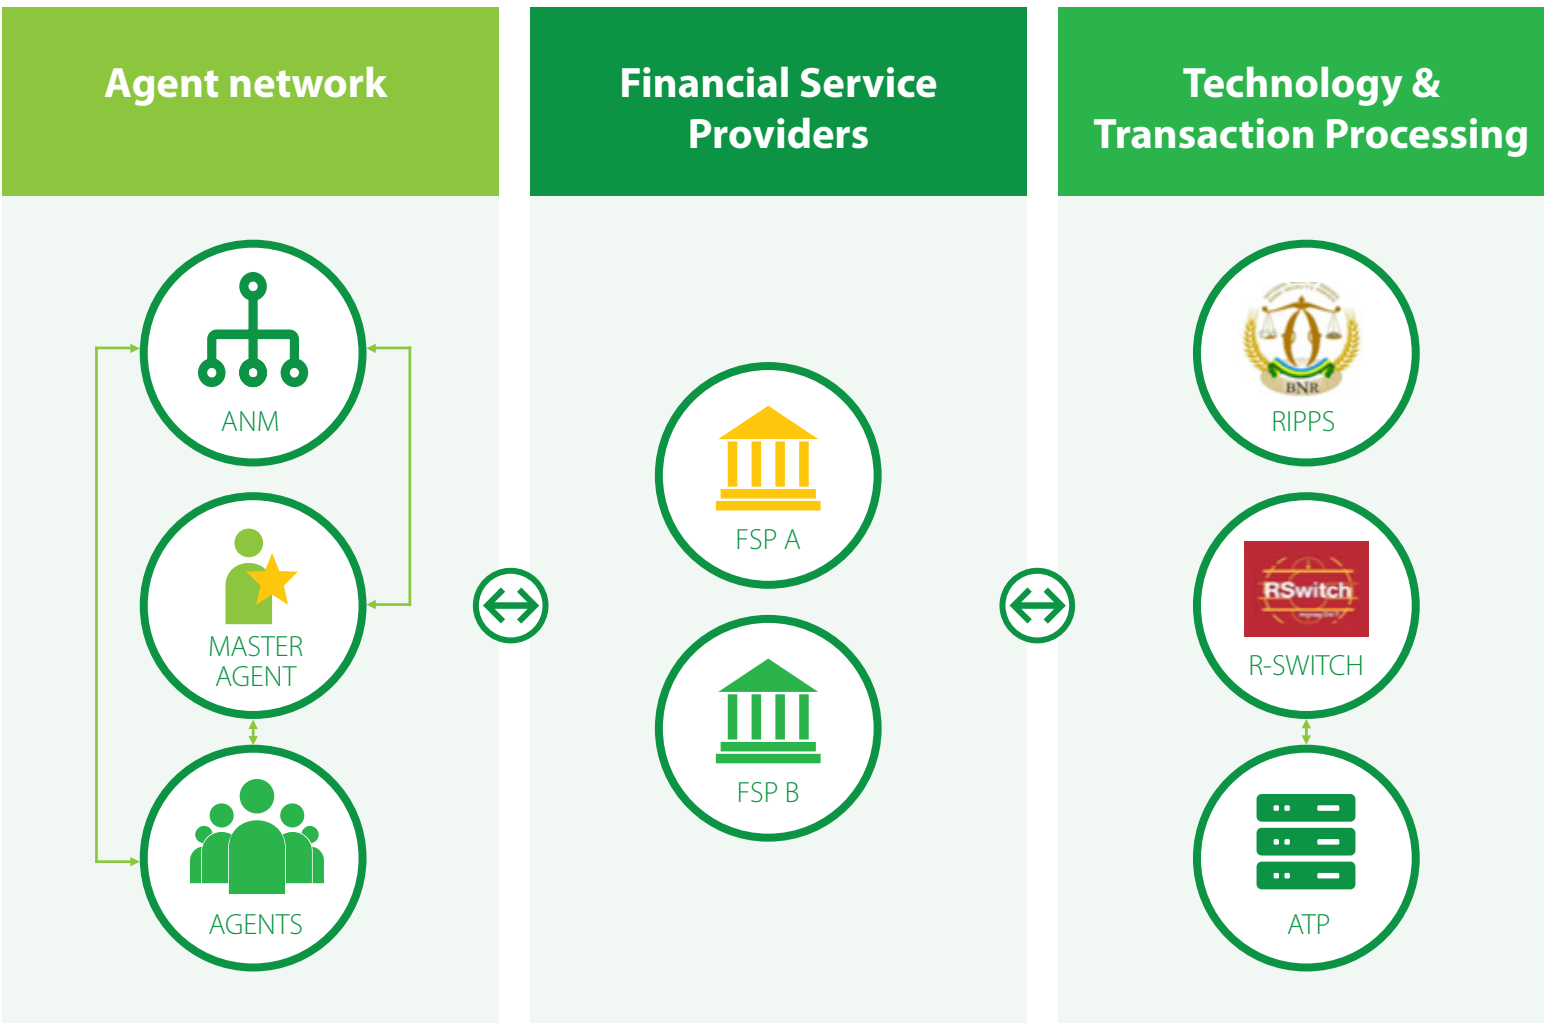

Reduce business costs:

- Share agent network infrastructure
- Outsource agent network management

Stimulate end-user usage:

- Diversify product offering
- Expand access options - mobile, card

Implementation Overview

Agent network

AGENT

- Customer service support
- Transaction initiation
- Customer account opening

Stakeholder Engagement Breakfast Meeting
30th August 2018

Q&A

How does this project fit in with the larger interoperability project?

What happens to our already existing deployment?

What exactly does a Bank need to participate in the Project?

What is the Governance and Management Structure?

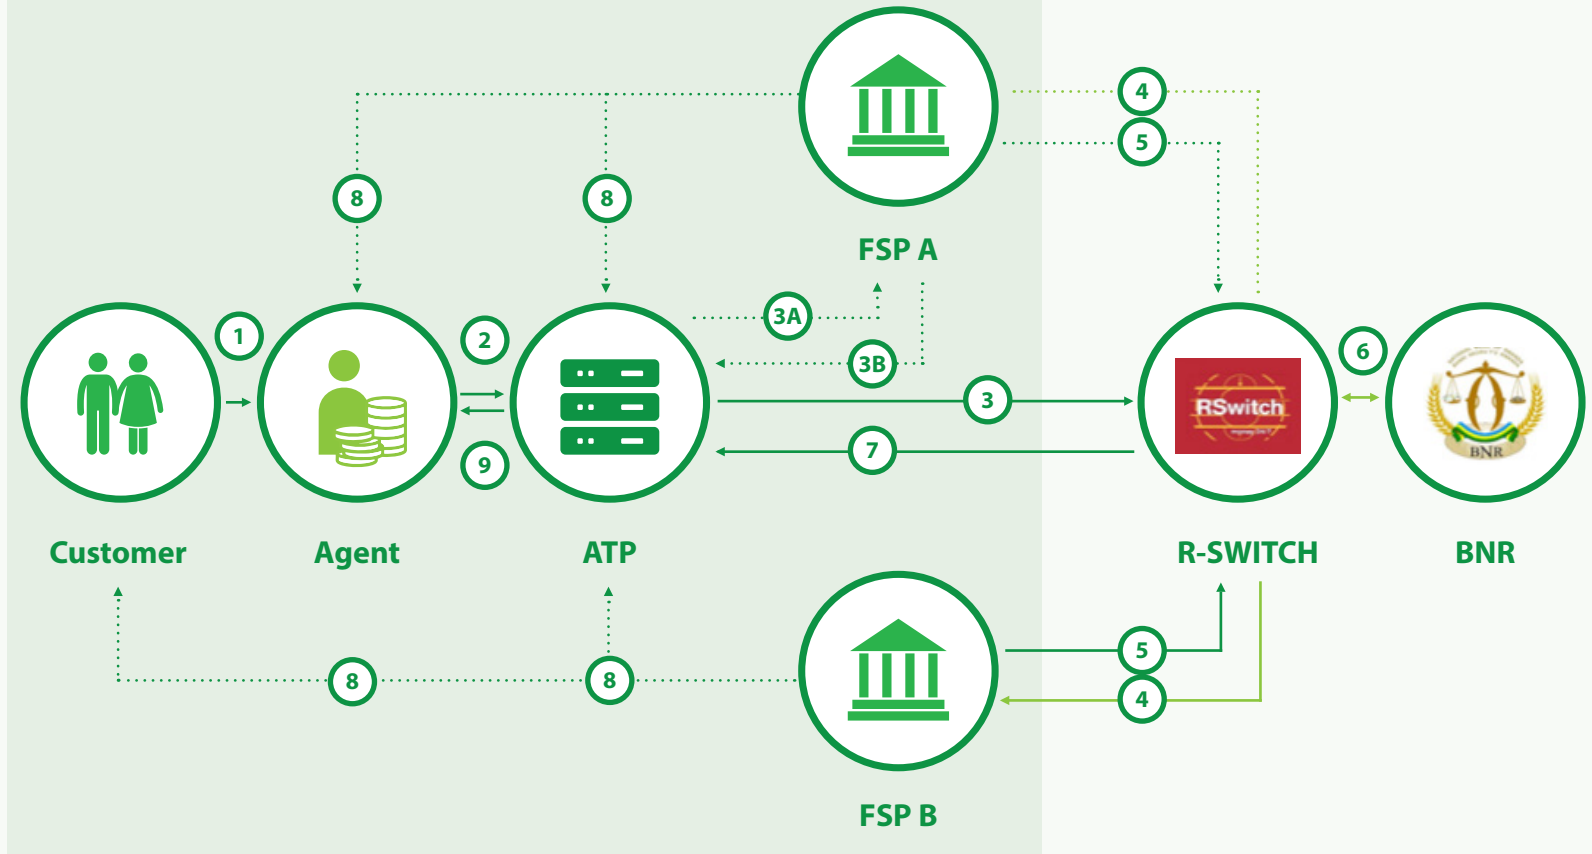

Has this been tried elsewhere?

When do we expect the project come to life in Rwanda?

Typical Process Flow for an Off-Us Transaction

Challenges in our industry

Customer Trends

Data Silos

**Account Centric vs
Customer Centric**

**Business
revolves around
accounts**

**Channel Specific
Solutions**

**Experience and
incentives are
disconnected**

Legacy/Batch

**Building
products on
top of 1950s
infrastructure**

Bank > Customer

**Services &
solutions based
on capacity vs
customer need
physical rather
than digital**

The Project Status

Product & Technology Milestones

- Strategic implementation plan
- Customer txn process
- Settlement process
- Hardware specifications

- Product requirements & specification analysis
- Architecture & high level design
- Detailed design
- FSP APIs specifications

• System Development

- System Development
- Unit testing
- Integration & testing

- System & user acceptance testing
- Piloting
- Production migration, regression testing

System Maintenance & Operational Support
